SUMMARY

Computer Science graduate from Telkom University with a Scopus-indexed research background in Deep Learning. Experienced in delivering end-to-end digital solutions, including high-performance HRIS for the Ministry of Finance and ML-driven engines at DBS Foundation. Expert in bridging complex technical architectures with measurable business ROI.

WORK EXPERIENCES

Ministry of Finance of The Republic of Indonesia (DJSPSK)

Software Engineer (Project Consultant)

November 2025 - April 2026

- Architected and deployed a high-performance HRIS for 300+ employees using Laravel and React, automating 15+ core workflows and cutting data processing latency by 40%.
- Engineered scalable database schemas and real-time executive dashboards to modernize legacy systems, securing 100% data integrity for high-stakes government reporting.
- Spearheaded the development of the HR department's internal SharePoint portal and standardized official SOPs, eliminating administrative bottlenecks and accelerating cross-functional alignment.

DBS Foundation Coding Camp (PT Bank DBS Indonesia)

AI/ML Trainee

January 2025 - July 2025

- Designed and deployed an end-to-end Recommendation Engine using Python and TensorFlow, achieving 90% accuracy utilizing Hybrid CNN-BiLSTM architectures for the 'Kampaiyn' platform.
- Built automated data pipelines (SQL, Pandas) and a real-time Instagram scraper (Selenium, BeautifulSoup), slashing manual preprocessing time by 30% while scaling data ingestion capabilities.
- Translated complex deep learning metrics into actionable digital marketing strategies for corporate stakeholders, driving data informed business decisions.

Telkom Metra (PT. Multimedia Nusantara)

Web Developer Intern

July 2024 - September 2024

- Developed a full-stack Automated Document Numbering Engine (Laravel) for the internal MSIS platform, guaranteeing 100% data consistency across thousands of corporate records.
- Optimized database architecture for scalable document tracking, significantly accelerating data retrieval and reducing manual document management time by up to 80%.

PROJECT EXPERIENCES

Career Tracking & Data Analysis Application (TraKerja) | trakerja.web.id

- Launched a proprietary SaaS ready platform to digitize job application lifecycles, integrating interactive data analytics dashboards to visualize career trends for 500+ active users.
- Architected full-stack deployment using Laravel, implementing automated status tracking and trend analysis that cut manual record keeping time for job seekers by 50%.

Independent Software Consultant

- Spearheaded end-to-end development for multiple commercial clients (PT Tiga Inspirasi Bersama, PT Nikawa Teknika Indonesia, DjokiHub), delivering SEO-optimized corporate platforms using Next.js to enhance digital presence.
- Engineered and deployed real-time Computer Vision security models utilizing YOLOv8 and PyTorch, optimizing object detection accuracy for client-specific surveillance needs.

EDUCATION

Telkom University – Bandung, Indonesia

Bachelor of Computer Science (Informatics)

2021 - 2025

- **Multimodal Sentiment Analysis Engine (Scopus-Indexed Research):** Authored a paper on "Hybrid CNN-BiLSTM for Multimodal Sentiment Analysis" at IEEE SOFTT 2025, leveraging deep learning to analyze mental health indicators from 40,000 entries.

ADDITIONAL

Technical Skills:

- **Programming Languages:**
 - Python, PHP, JavaScript, Java, SQL, Go, C#
- **Databases, Cloud & Tools:**
 - MySQL, Oracle, Amazon Web Services (AWS), Google Cloud Platform (GCP), Docker, Git, CI/CD, RESTful APIs
- **Frameworks & Libraries:**
 - Laravel, React.js, Node.js, Spring Boot, TensorFlow, PyTorch, Scikit-learn, Pandas, OpenCV, MediaPipe, Bootstrap

Certifications & Professional Development:

- Coding Camp 2025 powered by DBS Foundation, specializing in Machine Learning Engineer
- Dicoding Indonesia:
 - Cloud Practitioner Essentials
 - Machine Learning Terapan

Languages:

- Indonesian (Native Proficiency)
- English (Upper-Intermediate)
